

CODE INTEL SOLUTIONS

By: Monde Shange & Khanya Ngema

Step 1: Learn the Basics (7–10 hours max)

You only need to know enough to deliver results, not become a coder.

✂ Tools to Learn (Free or Cheap):

Tool	What It Does	How to Learn
ChatGPT	Writes content, answers FAQs, makes scripts	You're using it now. Ask me anything to simulate business cases
Zapier	Connects apps (e.g. Google Forms → Email)	zapier.com/learn
ManyChat or Tidio	Chatbots for Facebook, Instagram, websites	YouTube has fast tutorials
Calendly	Booking system automation	calendly.com – super intuitive

Step 2: Choose Your Niche

Pick one type of business so you can focus on your pitch.

Easy Niches:

- Hair & beauty salons
- Gyms or personal trainers
- Real estate agents
- Clinics (dental, physio)
- Car washes or detailers
- Pet groomers

Pick one you're familiar with or that's common near you.

Step 3: Create Your Offer

Keep it SIMPLE: Focus on solving 1-2 real problems.

Problem	Solution You Offer
Missed customer inquiries	Install a chatbot to reply instantly 24/7
Manual appointment scheduling	Set up Calendly + auto reminders
No time for social media	Use ChatGPT to create a month of posts in an hour
No email follow-ups	Use Mailchimp + AI to automate follow-ups

Start with 1-2 services. Don't overwhelm yourself.

Step 4: Pricing

Starter Pricing:

- Setup: \$100–\$300 one-time
- Monthly management: \$100–\$500/month

Tip: Your first client can be free or \$50 just to build a testimonial.

Step 5: Outreach Strategy (Get Your First Clients)

You don't need a website yet. Use this method:

Cold DM Script (Instagram or WhatsApp):

Hey [Name], I love what you're doing with [business]. I help small businesses save time by automating customer messages and appointment booking using simple AI tools.

Are you open to a free 15-min demo? No pressure — I just want to show how it could help you get more bookings & save time.

Local Walk-in Script:

"Hey! I'm working with small businesses in [your area] to set up automated systems to save time — things like replying to messages instantly or automating bookings. I'd love to show you how it works — do you have 5 mins now or should I come back later?"

Step 6: Delivering the Service

Once they say yes:

1. Ask their pain point (bookings? messages? emails?)
2. Set up simple tools:
 - * ChatGPT: Write scripts for FAQs or posts
 - * Calendly: For bookings
 - * Zapier: To connect tools
3. Show them how to use it (or manage it for them)

Step 7: Upsell or Ask for Referrals

Once you deliver value, ask:

“Do you know anyone else who might benefit from this setup?”

Or offer add-ons:

- * Monthly social media post creation (with AI)
- * Analytics reports
- * Email marketing setup

Suggested Agency names

- AppVantage Labs
- CodeForge Solutions
- Applifyworks
- PixelPilot

COMPANY RELATED QUESTIONS AND KEY TAKE AWAYS

CALENDLY

Pinned Points:

- Event names
- Descriptions/instructions
- Date range (e.g. 7 days into the future or before the event)
- Duration
- Custom hours

ZAPIER

Pinned Points:

- Eliminates Repetitive Manual Tasks
- Creates Instant Notifications & Alerts
- Automatically Syncs Data Between Apps
- Populated Reports & Sheets Automatically
- Triggers Actions from Form Submissions
- Sends Personalized, Automated Follow-Ups
- Centralizes Information from Multiple Sources

- Enterprise: contact for pricing

What exactly are we doing and how do we go about doing it?

You are not selling “AI” or “automation”.

You are selling:

- Faster customer responses
- More bookings
- Less admin work
- Fewer missed leads
- More professional customer experience

This matters because South African SMEs buy outcomes, not tech.

Your offer is best described as:

“Customer communication and booking automation for small service businesses.”

That framing already tells us *who* needs you most.

The Ideal Customer Profile (South Africa–Specific)

You should focus on businesses that meet ALL of these conditions:

1. Service-based (appointments, enquiries, DMs)
2. Owner-managed (owner answers WhatsApps/Instagram themselves)
3. High enquiry volume but poor response time
4. Little to no automation
5. Active on WhatsApp, Instagram, or Facebook

This describes a huge portion of SA SMEs.

Best Businesses to target

1. Hair, Beauty & Grooming Businesses (TOP PRIORITY)

Examples:

- Hair salons
- Nail bars
- Barbershops
- Lash/brow technicians
- Mobile beauticians

Why this niche is perfect in SA:

- Extremely common in townships, suburbs, malls
- Heavy WhatsApp & Instagram DM usage
- Constant appointment scheduling
- Owners miss messages during busy hours
- Low tech adoption, high pain

Problems they have:

- “Sorry, we missed your message”
- Double bookings
- No reminders → no-shows
- Owner overwhelmed

Your automation solves:

- Auto-replies on WhatsApp/Instagram
- Booking links via Calendly
- Reminder messages
- FAQ chatbot (prices, location, hours)

Why they will pay:

- One missed booking = lost cash
- You directly increase bookings
- Easy to explain value in 5 minutes

2. Medical & Wellness Clinics (Dental, Physio, Therapy)

Examples:

- Dental clinics
- Physiotherapists
- Chiropractors
- Optometrists
- Counselling practices

Why this works well in SA:

- Appointments are the business
- Receptionists are overwhelmed
- Missed calls = lost patients
- Professional image matters

Problems:

- Missed calls
- Manual booking
- No follow-up reminders
- Patients asking same questions repeatedly

Your automation helps:

- Booking system
- Auto reminders (reduces no-shows)
- FAQ chatbot
- Email/SMS follow-ups

Why they will pay more:

- Higher revenue per client
- Used to paying for systems
- See automation as “professional”

This is a higher-paying niche once you gain confidence.

3. Real Estate Agents & Property Professionals

Examples:

- Independent estate agents
- Rental agencies
- Property managers

Why SA-specific demand exists:

- Leads come from WhatsApp, Facebook, Property24
- Agents are always “busy”
- Slow replies lose deals

Problems:

- Missed enquiries
- No follow-up
- Leads go cold

Automation value:

- Instant reply chatbot
- Lead capture forms
- Automated follow-ups
- Calendar scheduling for viewings

Why they pay:

- One deal covers your fee for months
- Competitive market → speed matters

4. Gyms, Personal Trainers & Fitness Studios

Examples:

- CrossFit boxes
- Bootcamp trainers
- Yoga studios
- Personal trainers

Why this niche works:

- Constant enquiries
- Schedule-heavy
- High WhatsApp usage
- Owners are busy coaching

Automation helps with:

- Trial bookings
- Class schedules
- Automated responses
- Follow-ups for leads who “ghost”

5. Car Washes, Detailers & Mechanics (Underrated)

Examples:

- Mobile car washes
- Detailing businesses
- Small workshops

Why SA reality matters here:

- Many operate informally
- Still rely on WhatsApp
- No structured booking system

Your automation:

- Booking links
- Auto price replies
- Location & operating hours bot
- Reminder messages

This niche responds well to in-person walk-ins.

4. Who You Should AVOID (At First)

Do not target initially:

- Large corporations
- Government
- Highly regulated banks
- Tech startups (they already automate)
- E-commerce stores (different problem set)

They take too long to decide and overcomplicate things.

5. Pricing Reality for South Africa

Your current pricing aligns well, but here is the local reality adjustment:

Recommended SA Pricing (More Realistic)

- Setup: R1,000 – R3,000 once-off
- Monthly management: R500 – R2,000/month

For first clients:

- Free setup or R500 to build proof

Explain pricing as:

“This costs less than one lost booking per month.”

That logic lands well locally.

6. How You Should Find These Customers (Practically)

1. Walk-ins (Extremely Effective in SA)

Especially for:

- Salons
- Barbers
- Car washes

Why:

- Trust is face-to-face
- Owners decide immediately
- Less resistance than online pitching

2. WhatsApp & Instagram DMs

Especially for:

- Beauticians
- Trainers
- Agents

SA businesses live on WhatsApp — use it.

3. Referrals

Once you automate one salon:

- Every owner knows 5 others
- Referrals close faster than cold leads

7. Why Your Automation Is a GOOD Business in SA

South Africa has:

- High smartphone usage
- Heavy WhatsApp dependence

- Low automation adoption
- Many owner-managed SMEs
- High unemployment → owners do everything themselves

This creates a perfect gap:

Businesses want help but cannot afford big agencies.

You sit in the sweet spot:

- Affordable
- Practical
- Results-driven
- Local

8. If You Want a Clear Starting Plan

Recommended path:

1. Pick Hair & Beauty as your first niche
2. Offer:
 - Auto-replies
 - Booking automation
 - Reminders
3. Get 1–2 testimonials
4. Move into clinics or real estate
5. Increase pricing gradually
